## Summary

Summary of your recent exam

Result: **Pass**

Marks: **29/40**

Percentage: **72.50 %**

Questions: **40**

Correct Answers: **29**

Attempted: **40**

1. Which of these can not be used for a variable name in Java?

Answers

1. identifier

2. keyword

3. identifier & keyword

4. none of the mentioned

2. Which of the following best defines a class?

3. Which component is used to compile, debug and execute the java programs?

1. Which of these can not be used for a variable name in Java?

2. Which of the following best defines a class?

Answers

1. Parent of an object

2. Instance of an object

3. Blueprint of an object

4. Scope of an object

3. Which component is used to compile, debug and execute the java programs?

4. predict the output of following java program?

```
class Test
{
    int i;
}
class Main{
    public static void main(String[] args)
    { Test t;
        System.out.println(t.i);
    }
}

36. What is -Xms and -Xmx while starting jvm?

37. What allows the programmer to destroy an object x?

38. Which of these class relies upon its subclasses for complete implementation of its methods?

39. Which of the following is an incorrect statement about Interface?

40. What happens when we access the same variable defined in two interfaces implemented by the same class?

Answers

1. Compilation failure

2. Runtime Exception

3. The JVM is not able to identify the correct variable

4. The `interfaceName.variableName` needs to be defined
