1. In MongoDB, which of the following command is used to create collection by name "mycollection"?

- A. create mydb ("mycollection")
- B. db.createCollection("mycollection")
- C. createDatabase mydb
- D. createDatabase mydb("mycollection")

A  B  C  D

2. A table contains information of employee details and projects to which employee is assigned.

Each employee works on many projects. For the given table primary key is composite key formed by empno, projectno. The table contains following columns: empno, empname, salary, projectno, pname, plocation. Then which of the following normalization form the table does not support?

- A. 1 NF
- B. 2 NF
- C. given information is insufficient
- D. None of the above
