2. Element is design to wrap a single piece of information

3. In HTML5, it is possible to validate entered data by setting the _____ attribute for a form control.

Answers

1. allow

2. validate

3. restrict

4. required

4. An internal style sheet should be used when a single document has a

5. In JavaScript which of the following is not a data type

6. IN JS, a function name becomes optional when _____

7. Find correct output of below snippet
Int x=8;
if(x>9) {

The screenshot shows a quiz interface with a sidebar containing navigation links like Dashboard, Quiz, Feedback, etc. The main area displays several multiple-choice questions. Question 3 asks about HTML5 validation, and its answers include 'allow', 'validate', 'restrict', and 'required'. Question 7 shows a snippet of JavaScript code with a syntax error ('Int' instead of 'let') and asks for the correct output.

2. Element is design to wrap a single piece of information

3. In HTML5, it is possible to validate entered data by setting the _____ attribute for a form control.

Answers

1. Unique style

2. Common style

3. Both of the above

4. None of the above

4. An internal style sheet should be used when a single document has a

5. In JavaScript which of the following is not a data type

6. IN JS, a function name becomes optional when _____

7. Find correct output of below snippet
Int x=8;
if(x>9) {

This screenshot shows the same quiz interface as the first one, but with different answers for question 3. The correct answers are now 'Unique style', 'Common style', 'Both of the above', and 'None of the above'. The other questions and the snippet remain the same.

3. In HTMLs, it is possible to validate entered data by setting the _____ attribute for a form control.

4. An internal style sheet should be used when a single document has a

5. In JavaScript which of the following is not a data type

Answers

1. Boolean
2. Number
3. Undefined
4. **Float**

6. IN JS, a function name becomes optional when _____

7. Find correct output of below snippet

```
Int x=8;  
if(x>9) {  
    document.write(9);  
} else {  
    document.write(x);  
}
```

5. In JavaScript which of the following is not a data type

6. IN JS, a function name becomes optional when _____

Answers

1. The function is predefined
2. The function is defined as a looping statement
3. **The function is defined as expressions**
4. All of the above

7. Find correct output of below snippet

```
Int x=8;  
if(x>9) {  
    document.write(9);  
} else {  
    document.write(x);  
}
```

8. Which is the correct value calling a JavaScript code?

Code with arrays.in 8007592194

The image displays two side-by-side screenshots of a web-based quiz application titled "Sunbeam". The left screenshot shows a quiz section with questions 6 through 10. Question 6 asks about JavaScript function naming. Question 7 shows a snippet of code with an if-else statement and asks for the output. Question 8 asks for the correct value calling a JavaScript code. Question 9 asks what everything is in the HTML DOM. Question 10 asks when an event occurs when the user clicks on an element. The right screenshot shows a continuation of the quiz with questions 7 through 12. Question 7 is the same as in the first screenshot. Question 8 asks for the correct value calling a JavaScript code. Question 9 asks what everything is in the HTML DOM. Question 10 asks when an event occurs when the user clicks on an element. Question 11 asks for an inbuilt method in jQuery used to hide the selected element. Question 12 asks which method is used to make an asynchronous HTTP request.

6. IN JS, a function name becomes optional when _____

7. Find correct output of below snippet
Int x=8;
if(x>9) {
 document.write(9);
} else {
 document.write(x);
}

Answers

1. 8
2. 9
3. 0
4. Undefined

8. Which is the correct value calling a JavaScript code?

9. In the HTML DOM (Document Object Model), everything is a _____

10. When an event occurs when the user clicks on an element is

document.write(9);
} else {
 document.write(x);
}

8. Which is the correct value calling a JavaScript code?

Answers

1. RMI
2. Triggering Event
3. Function/Method
4. Preprocessor

9. In the HTML DOM (Document Object Model), everything is a _____

10. When an event occurs when the user clicks on an element is

11. _____ is an inbuilt method in jquery used to hide the selected element.

12. Which method is used to make an asynchronous HTTP request?

10. When an event occurs when the user clicks on an element is

11. _____ is an inbuilt method in jQuery used to hide the selected element.

Answers

1. `jQuery.ajaxAsync()`
2. `jQuery.async()`
3. `jQuery.ajax()`
4. None of the above

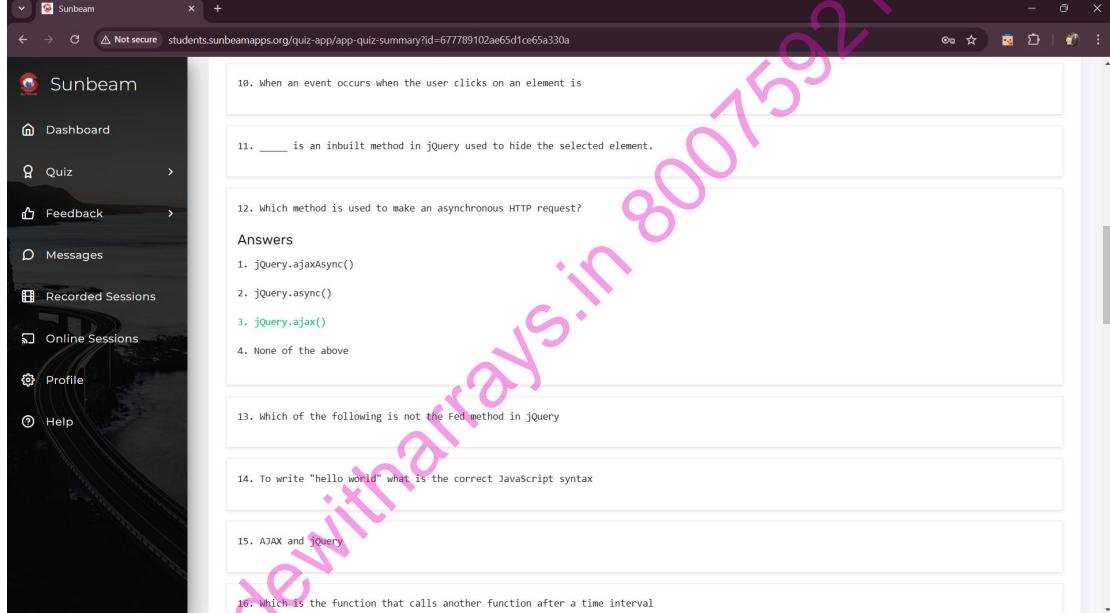

12. Which method is used to make an asynchronous HTTP request?

13. Which of the following is not the Fed method in jQuery

14. To write "Hello world" what is the correct JavaScript syntax

15. AJAX and jQuery

16. Which is the function that calls another function after a time interval

The image displays two side-by-side screenshots of a web-based quiz application titled "Sunbeam". The left screenshot shows questions 11 through 17, while the right screenshot shows the same set of questions. Both screenshots feature a dark-themed sidebar on the left with icons for Dashboard, Quiz, Feedback, Messages, Recorded Sessions, Online Sessions, Profile, and Help. The main content area contains numbered questions and a "Answers" section.

Screenshot 1 (Left):

- 11. _____ is an inbuilt method in jquery used to hide the selected element.
- 12. Which method is used to make an asynchronous HTTP request?
- 13. Which of the following is not the Fed method in jquery

Answers:

1. fadeTo()
2. fedIn()
3. fadeOut()
4. fadeOn()

14. To write "Hello world" what is the correct JavaScript syntax

15. AJAX and jQuery

16. Which is the function that calls another function after a time interval

17. In the below notation, the employee is of type {"Employee": ["Amy", "Bob", "John"]}

Screenshot 2 (Right):

- 11. _____ is an inbuilt method in jquery used to hide the selected element.
- 12. Which method is used to make an asynchronous HTTP request?
- 13. Which of the following is not the Fed method in jquery

Answers:

1. document.write("Hello world")
2. response.write("Hello world")
3. ("Hello world")
4. None of the above

15. AJAX and jQuery

16. Which is the function that calls another function after a time interval

17. In the below notation, the employee is of type {"Employee": ["Amy", "Bob", "John"]}

A large, diagonal watermark reading "Codewitharrays.in 8007592194" is overlaid across both screenshots.

Sunbeam

32. What is the default scope in the Node.js application?

33. Third-party packages can be install/update/delete using _____

34. What is the purpose of the Node object property ownerDocument?

Answers

1. Returns the immediate node

2. Returns the parent node

3. Returns the root element

4. Returns the last element

35. Which statement is valid in using a Node module fs in a Node-based application?

36. What is the children prompt?

Code with arrays.in 8007592194

The image displays two side-by-side screenshots of a web-based quiz application titled "Sunbeam". The left screenshot shows questions 33 through 38, while the right screenshot shows the same set of questions. Both screenshots feature a dark-themed sidebar on the left with icons for Dashboard, Quiz, Feedback, Messages, Recorded Sessions, Online Sessions, Profile, and Help. The main content area contains numbered questions and their corresponding answer sections.

Screenshot 1 (Left):

- 33. Third-party packages can be install/update/delete using _____
- 34. What is the purpose of the Node object property ownerDocument?
- 35. Which statement is valid in using a Node module fs in a Node-based application?
Answers:
1. import fs
2. package fs
3. var fs = require("fs")
4. var fs = import("fs")
- 36. What is the children prompt?
- 37. Consider the following code from React Route, What do you call:id in the path prop?
<Route path="/:id" />
- 38. What is sent to an Array.map() function?

Screenshot 2 (Right):

- 33. Third-party packages can be install/update/delete using _____
- 34. What is the purpose of the Node object property ownerDocument?
- 35. Which statement is valid in using a Node module fs in a Node-based application?
- 36. What is the children prompt?
Answers:
1. A property that adds children components to state
2. A property that lets you pass components as data to other components
3. A property that lets you set an array as a property
4. A property that lets you pass data to child elements
- 37. Consider the following code from React Route, What do you call:id in the path prop?
<Route path="/:id" />
- 38. What is sent to an Array.map() function?

A large, diagonal watermark reading "Codewitharrays.in 2007592194" is overlaid across both screenshots.

The image shows two screenshots of a web-based quiz application interface for Sunbeam. The interface has a dark-themed sidebar on the left with icons for Dashboard, Quiz, Feedback, Messages, Recorded Sessions, Online Sessions, Profile, and Help. The main content area displays a series of questions and their answers.

Screenshot 1 (Top):

- 33. Third-party packages can be install/update/delete using _____
- 34. What is the purpose of the Node object property ownerDocument?
- 35. Which statement is valid in using a Node module fs in a Node-based application?
- 36. What is the children prompt?
- 37. Consider the following code from React Route, What do you call:id in the path prop?
<Route path="/:id" />

Answers:

1. This is a route modal
2. **This is a route parameter**
3. This is a route splitter
4. This is a route link

38. What is sent to an Array.map() function?

Screenshot 2 (Bottom):

- 36. What is the children prompt?
- 37. Consider the following code from React Route, What do you call:id in the path prop?
<Route path="/:id" />
- 38. What is sent to an Array.map() function?

Answers:

1. What string describing what the function should do
2. The name of another array to iterate over
3. The number of times you want to called a function
4. **A callback function that is called once for each element in the array**

- 39. Why might you use useReducer over useState in React component?
- 40. What do you call a React component that catches JavaScript errors anywhere in the child component tree?

© 2025 Sunbeam

Codewitharrays.in 8207592194

The image displays two side-by-side screenshots of a web-based quiz application, likely from a mobile device or tablet, running on the Sunbeam platform. Both screenshots show a sidebar on the left with navigation links: Dashboard, Quiz, Feedback, Messages, Recorded Sessions, Online Sessions, Profile, and Help. The main content area contains four numbered questions:

36. What is the children prompt?
37. Consider the following code from React Route, What do you call:id in the path prop?
<Route path="/:id" />
38. What is sent to an Array.map() function?
39. Why might you use useReducer over useState in React component?

Answers

1. When you need to manage more complex state in an app
2. When you want to replace Redux
3. When you want to improve performance
4. When you want to break your production app

40. What do you call a React component that catches JavaScript errors anywhere in the child component tree?
